## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-15 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by either Sutton 4,788,893 or Thomas et al 5,337,632.

Both Sutton and Thomas et al teach door opening angled device made of metal or plastic and having a hole at one end for a key ring or chain to be attached thereto. It is noted that the method and functional limitations regarding the use of the device on a frozen door are merely considered to be intended use of the device and are not accorded patentable weight.

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the openers of the cited art including key ring apertures.
